

TROPOSPHERIC WATER / TROPOSPHEROL

Tropospherol contains 6.1 - 8.2 - 9.8 mg/l of dissolved forest oxygen, while ordinary water has up to 5 mg/l. TROPO water is produced on the basis of dew, using forest oxygen. It does not deteriorate, it maintains its structure for years.

[> More About Water](#)

The Goal of Tropospherol Project

We take pride in supplying people with high-quality water, contributing to the rejuvenation of their strength, the enhancement of their health, and the pursuit of a more fulfilling life

- Cleanse To Heal

Drinking this water in the morning can provide a significant boost for the entire body, aiding in cleansing and healing. Moreover, the oxygen content enhances the activity of the central nervous system and reduces fatigue

- Fight Disease

People experience recovery from chronic diseases and inflammations, as their immunity strengthens. Oxygen enhances wound healing and promotes comprehensive regeneration, improving both blood circulation and metabolism

- Regeneration

Oxygen triggers regeneration, leading to improvements in the condition of the skin and hair. It assists in tissue recovery, stimulates collagen and elastin production, and even dormant seeds, when nourished with this oxygen-rich water, sprout unexpectedly and rapidly

What Is Structured Water?

Words create a unique vibration that water feels. When water is shown the written word, he receives it as a vibration and expresses the message in a certain form – it is a visual expression of words code. The famous Japanese scientist Masaru Emoto conducted an experiment: The words “Thank you” formed beautiful geometric crystals, no matter what language they were spoken.

To words of low vibrations, like that “...you’re a fool” the water reacted differently and formed obviously different crystals. When a solid geometric crystal is formed, water aligns with nature and the phenomena that we call life. Words, gratitude and love reflect the basics of nature and life the laws of manifestation

Diverse Applications

This product naturally contains a minimum amount of natural minerals and is richly saturated with natural tropospheric oxygen, so “TROPOSPHEROL” can be used as a raw material (and not only) for medicine, cosmetics, food, flora, fauna, household appliances, daily household needs, etc. i.e. Be the first to get acquainted with this unique product and make sure of its effectiveness.

Tropospherol Extraction Process

“TROPOSPHEROL” is extracted by liquefying air from microclimate spaces in the troposphere. The chemical and biological composition of the product was confirmed by the results of the tests of the accredited laboratory.

Oxygen Enrichment

“TROPOSPHEROL” contains 6.1 - 9.8 mg/l of dissolved forest oxygen, while ordinary water has up to 5 mg/l. TROPO water is produced on the basis of dew, using forest oxygen.
